As of 27 October 2021 (last rating action) Fitch Ratings has assigned the following Ratings:

- Short Term IDR: **F1+**

A short term issuer default rating (**IDR**) issued by Fitch reflects a financial institution's vulnerability to default in the short term. For financial institutions and most other issuers, the "short term" typically means up to 13 months. An 'F1' rating indicates the strongest intrinsic capacity for timely payment of financial commitments; may have an added "+" to denote any exceptionally strong credit feature.

- Long Term IDR: AA-, [stable](#) outlook

A long term IDR issued by Fitch in respect of a financial institution expresses Fitch's opinion on that institution's relative vulnerability to default on its financial obligations. In accordance with Fitch's rating definitions, the default risk addressed by the IDR is generally that of the financial obligations whose non-payment would "best reflect the uncured failure of that entity". Fitch considers that the obligations of financial institutions whose non-payment would best reflect uncured failure are usually senior obligations to third-party, non-government creditors. IDRs of financial institutions therefore typically opine on the probability of default on such obligations. An 'AA' rating denotes expectations of very low default risk. They indicate very strong capacity for payment of financial commitments. This capacity is not significantly vulnerable to foreseeable events.

The Fitch Ratings group of companies established in the EU, which includes Fitch Ratings Ireland Limited, was registered on 31 October 2011 in accordance with the CRA Regulation.

As of 19 September 2019 (last rating action) Moody's France S.A.S. has assigned the following Ratings:

- Short Term Debt: Prime-1
- Long Term Debt: Aa3, [stable](#) outlook

Ratings assigned on Moody's global long-term and short-term rating scales are forward-looking opinions of the relative credit risks of financial obligations issued by non-financial corporates, financial institutions, structured finance vehicles, project finance vehicles, and public sector entities. Long-term ratings are assigned to issuers or obligations with an original maturity of one year or more and reflect both on the likelihood of a default on contractually promised payments and the expected financial loss suffered in the event of default. Short-term ratings are assigned to obligations with an original maturity of thirteen months or less and reflect the likelihood of a default on contractually promised payments.

A 'Prime-1' rating reflects a superior ability to repay short-term obligations. Obligations rated 'Aa' are judged to be of high quality and are subject to very low credit risk. Moody's appends numerical modifiers 1, 2, and 3 to each generic rating classification from Aa through Caa. The modifier 1 indicates that the obligation ranks in the higher end of its generic rating category; the modifier 2 indicates a mid-range ranking; and the modifier 3 indicates a ranking in the lower end of that generic rating category.

Moody's France S.A.S. was registered on 31 October 2011 in accordance with the CRA Regulation.

As of 19 October 2021 (last rating action) S&P Global Ratings Europe Limited has assigned the following Ratings:

- Short Term Debt: A-1
- Long Term Debt: A+, [stable](#) outlook

S&P's credit ratings express S&P's opinion about the ability and willingness of an issuer to meet its financial obligations in full - and on time. Beyond that, credit ratings can also speak to the credit quality of an individual debt issue and the relative likelihood that the issue may default. Ratings are expressed as letter grades that range from 'AAA' to 'D' (in the case of long term ratings) or 'A-1' to 'D' (in the case of short term ratings) to communicate S&P's opinion of relative level of credit risk.

A short-term obligation rated 'A-1' is rated in the highest category by Standard & Poor's. The obligor's capacity to meet its financial commitment on the obligation is strong. This indicates that the obligor's capacity to meet its financial commitment on these obligations is extremely strong. A long term obligation rated 'A' is somewhat more susceptible to the adverse effects of changes in circumstances and economic conditions than obligations in higher-rated categories. However, the obligor's capacity to meet its financial commitment on the obligation is still strong. The ratings from 'AA' to 'CCC' may be modified by the addition of a plus (+) or minus (-) sign to show relative standing within the major rating categories.

S&P Global Ratings Europe Limited was registered on 31 October 2011 in accordance with the CRA Regulation.

Crédit Agricole CIB is dependent on the performance of its subsidiaries and affiliates.
